

ELITE Timber
Supplies

Timber

We only obtain wood from reputable and ethical contacts that originate from responsibly sourced forests. Our timber products have been developed over many years, where some can take up to 50% longer to produce more growth rings, in our pursuit to produce high quality solutions. Through the mill, we can cut and machine wood to your specific requirements including thickness, shape and length!

Sawn & Treated

Our sawn timber is natural, rough sawn and untreated making it most suitable...

Oversized & Specialist

We supply large sections and long length timber that are oversized for your particular use...

Decking

High quality composite and joinery grade that is easily installed onto supporting parts...

CLS

The wood is durable, robust and generally used for timber home construction, internal, studwork...

Cladding

From the traditional feather edge, to a rustic edge, or smooth shadow lines of shiplap...

MDF Mouldings

Save time, effort and money with our MDF Mouldings that have resistance...

Mouldings

Mouldings that are easy to install, to give your project a premium and sleek finish...

Hardwood

Kiln dried for durability, the Hardwood's performance and appearance can be shaped...

Joinery & PAR

Perfect for interior joinery projects and applications requiring a smooth and clean finish...

Hardwood Bog Mats

100% hardwood for temporary roadways that are long-lasting, withstanding loads of 50+ tonnes...

Sawn & Treated Timber

Properly sourced timber from sustainable European sawmills with an expansive range of sizes.

Our Sawn Timber is natural, rough sawn and untreated making it most suitable for indoor structures, joists and joinery applications where there is little moisture or dampness.

Types

Sawn

Treated

Specifications

Width x Thickness	Lengths
38-225mm x 19-75mm	2.4m-6m
Tolerances:	3mm
Species:	Pine
Profiles:	Square edge / regularised
Grading:	C16 / C24
Treatments:	Brown or green

Please visit our website for specific sizes and disclaimer or contact us for lengths greater than 6 metres and heights greater than 75 millimetres.

UK delivery

All areas of the UK are covered, as well as same or next day delivery available on many products.

Bespoke products

Sometimes standard specifications won't suffice, so our bespoke service is specific to what you're looking for.

Financial advice

Support doesn't have to end after a sale. We care to help you get the results for your project.

Oversized & Specialist Timber

Timber is cut to specific requirements using cross cutting saws and milling equipment. Machine or visually graded are available in GS and SS grading, depending on species, and other ungraded and graded sections are normally C16 or C24 grading.

Types

Pine

Specifications

Width x Thickness	Lengths
100-300mm x 47-295mm	6m-9m
Tolerances:	3mm
Species:	Pine
Profiles:	Square edge
Grading:	C16 / C24
Treatments:	Brown or green

Please visit our website for specific sizes or contact us for lengths greater than 9 metres and with varied heights and widths.

On time

Feel assured with our process and scheduling techniques to deliver products as expected.

Great approach

We are with you every step of the way with communication for a great level of service.

Made to measure

Accuracy is important, so we do our utmost to find right sized items to match the job's requirements.

Decking Timber

High quality joinery grade and composite to transform the look of any project.

Manufactured from softwood or hardwood and finished to precision, the wood is treated with preservatives and kiln-dried for a long-life span, so that it's natural with no chemicals.

Types

Pine

Hardwood

Thermowood

Composite

Specifications

Width x Thickness	Lengths
150mm x 32mm	2.4-6m
Tolerances:	3mm
Species:	Pine, Hardwood, Thermowood or Composite

Hardwood Timber

Wood that is slow grown for a denser formation with different species that lends itself to a variety of uses.

The growth characteristics of Hardwood, like density and grain for example, reduce the tendency to split and make it a long-lasting timber for a variety of applications.

Our Hardwood is generally kiln dried for durability, performance and appearance so it can be shaped into a variety of objects for internal or external joinery, furniture, construction, flooring and more.

Specifications

Width x Thickness	Lengths
Custom sizes to fit your project	
Tolerances:	3mm
Species:	Hardwood
Profiles:	Custom made to requirements
Grading:	Custom made to requirements
Treatments:	Various treatments available - contact us to find out more

Please visit our website for specific sizes or contact us with your requirements, we can source a vast portfolio of profiles and sizes.
